### Asset Controllers

As a society, we have items with a cost; these are known as assets. Assets require monitoring to ensure that they actually do exist ( ! ) and that they are in the kept and recorded in the correct location. To do this we have asset controllers, but we need your help too. Please update any of the following people should you get given anything new for the society, or more importantly if a particular item you had no longer exists. We can then be sure to get the right level of insurance and have a proper account of everything we own - many thanks:
